

SCIENCE Writing Toolkit – UKS2 – Writing Prompts

Writing Prompts:

The Plastic-Free Challenge: Imagine a world where plastic no longer exists. How do people manage their everyday lives, and what are the benefits and challenges?

The Last Tree Standing: The last tree in your town is in danger of being cut down. How do you and your friends come together to save it?

Oceans Without Plastic: Picture the oceans free of plastic pollution. What would sea creatures and coastal areas look like, and how would it change the planet?

A Day in the Life of a Bee: Bees play a vital role in our ecosystem. Write a story from the perspective of a bee as it tries to survive in a world full of pesticides and pollution.

Mission: Recycle: You've been chosen as a recycling ambassador for your school. What steps will you take to reduce waste, encourage recycling, and protect the environment?

The Great Clean-Up: Your class is tasked with cleaning up a local park that's been littered with plastic and rubbish. What do you discover, and how do you work together to make a change?

The Bee Rescue Team: Bees are disappearing, and it's up to you and a team of scientists to find out why and come up with a plan to save them. How do you solve the mystery and protect the bees?

The Future of Forests: Imagine the future where forests have been restored and deforestation has stopped. What does the world look like, and how do people live differently?

A World Without Waste: In the year 2050, waste has been eliminated through new technologies and lifestyle changes. Describe what everyday life is like in this waste-free future.

The Ocean Heroes: You are part of a team working to save marine life from plastic pollution. What new inventions or ideas do you come up with to help protect the oceans?

SCIENCE Writing Toolkit – UKS2 – Sentence Starters
